Status of the Economy

Iowa nonfarm employment was reported at 1,496,900 for the month of September (not seasonally adjusted), 15,600 higher (1.1%) than September 2011.

Iowa's 12-month average employment is presented as the blue line on the following graph. Iowa's average nonfarm employment peaked in October 2008 at 1,526,400, and was 47,700 above the peak prior to the previous recession (January 2001). The current 12-month average reading is now 1,489,000, resulting in an annual average Iowa nonfarm employment level 37,400 below the October 2008 peak.

The employment chart also presents Iowa nonfarm employment as a percent of U.S. nonfarm employment. Iowa's share of U.S. nonfarm employment decreased noticeably from 1999 through 2002, decreased at a much slower pace from 2002 through 2007, and increased from January 2008 through June 2010. Since that time, Iowa's percent of U.S. employment has declined as the percentage growth in U.S. employment has exceeded the percentage growth in Iowa employment.

The Consumer Price Index (CPI-U) through September 2012 was 231.4 (1983/84=100). Consumer prices increased 0.4% in September (not seasonally adjusted) and the annual rate of inflation increased to 2.0% from the previous month's level of 1.7%. After 10 consecutive months of a decrease in the annual rate of inflation, the figure has increased the last two months.

Core CPI, an inflation measure excluding food and energy expenditures, increased 0.2% in September and totaled 2.0% year-over-year. The increase in the annual rate of core inflation represents its first increase in four months. For the two components excluded from the core rate, energy prices are up 2.3% year-over-year while food prices are up 1.6%.
